

# Constructing Quotient Inductive-Inductive Types (Technical Appendix)

AMBRUS KAPOSÍ, Eötvös Loránd University, Hungary  
ANDRÁS KOVÁCS, Eötvös Loránd University, Hungary  
THORSTEN ALTENKIRCH, University of Nottingham, United Kingdom

This is a technical appendix accompanying the titular paper. We reproduce here the table which summarizes the contents of this document in relation to the  $\text{CwF}_{\text{Eq}}^K$  model of QIIT signatures.

		CwF (24)				K (7)			Eq (3)

Authors' addresses: Ambrus Kaposi, Department of Programming Languages and Compilers, Eötvös Loránd University, Budapest, Hungary, akaposi@inf.elte.hu; András Kovács, Department of Programming Languages and Compilers, Eötvös Loránd University, Budapest, Hungary, kovacsandras@inf.elte.hu; Thorsten Altenkirch, School of Computer Science, University of Nottingham, United Kingdom, Thorsten.Altenkirch@nottingham.ac.uk.

## A DEFINITIONS OF THE OPERATIONS FROM SECTIONS 4–6

In this appendix we give the full definitions of the operations  $-^A$ ,  $-^C$  (Section 4 in the paper),  $-^M$ ,  $-^R$  (Section 5),  $-^D$ ,  $-^S$ ,  $-^E$  (Section 6).

Syntax	Algebras	Assuming $\Omega : \text{Con}$ , the <b>initial</b> $\Omega$ -algebra is given by $\text{con}_\Omega \equiv \Omega^C \text{id}$
$\Gamma : \text{Con}$	$\Gamma^A : \text{Set}$	$\Gamma^C : \text{Sub } \Omega \Gamma \rightarrow \Gamma^A$
$A : \text{Ty } \Gamma$	$A^A : \Gamma^A \rightarrow \text{Set}$	$A^C : (\nu : \text{Sub } \Omega \Gamma) \rightarrow \text{Tm } \Omega (A[\nu]) \rightarrow A^A (\Gamma^C \nu)$
$\sigma : \text{Sub } \Gamma \Delta$	$\sigma^A : \Gamma^A \rightarrow \Delta^A$	$\sigma^C : (\nu : \text{Sub } \Omega \Gamma) \rightarrow \Delta^C (\sigma \circ \nu) = \sigma^A (\Gamma^C \nu)$
$t : \text{Tm } \Gamma A$	$t^A : (\gamma : \Gamma^A) \rightarrow A^A \gamma$	$t^C : (\nu : \text{Sub } \Omega \Gamma) \rightarrow A^C \nu (t[\nu]) = t^A (\Gamma^C \nu)$
$\cdot : \text{Con}$	$\cdot^A : \equiv \top$	$\cdot^C \nu : \equiv \text{tt}$
$\Gamma \triangleright A : \text{Con}$	$(\Gamma \triangleright A)^A : \equiv (\gamma : \Gamma^A) \times A^A \gamma$	$(\Gamma \triangleright A)^C \nu : \equiv (\Gamma^C (\pi_1 \nu), A^C (\pi_1 \nu) (\pi_2 \nu))$
